^{*}These positions are held by the Fund's wholly owned subsidiary, Campbell Systematic Macro Offshore Limited, not directly by the Fund.

^{**}Futures quantity is represented in contracts, while FxForward is local currency units.

GENERAL DISCLOSURES

The portfolio holdings presented may not be representative of the fund's current or future investments. Portfolio holdings are subject to change and should not be considered to be investment advice. The holdings listed are unaudited and for informational purposes only. For an audited list of holdings, please refer to the Fund's most recent Annual or Semi-Annual Reports and SEC Form N-Q filings. Short positions are represented by negative position quantities.

RISK CONSIDERATIONS

Managed futures employ leverage; they are speculative investments that are subject to a significant amount of market risk and they are not appropriate for all investors. Although adding managed futures to a portfolio may provide diversification, managed futures are not a perfect hedging mechanism; there is no guarantee that managed futures will appreciate during periods of inflation or stock and bond market declines.

The Fund pursues its investment objective by (i) investing its assets pursuant to the Campbell Systematic Macro Program (ii) allocating up to 25% of its total assets in its wholly-owned subsidiary, Campbell Systematic Macro Offshore Limited (the "Subsidiary"), which is organized under the laws of the Cayman Islands and employs the Manager's Campbell Systematic Macro Program (as described below), and (iii) allocating the remainder of its assets directly in a portfolio of investment grade securities (including government securities) for cash management purposes. Securities rated in the four highest categories by the ratings agencies are considered investment grade. The Fund is non-diversified which means it may be invested in fewer securities at any one time than a diversified fund.

The Fund's investment activities involve a significant degree of risk and are suitable only for investors with a high tolerance for investment risk including the possible loss of principal. The Fund may invest in commodities, futures, forwards, derivatives, (options and swaps) and other derivatives based on fixed income securities which are subject to credit and interest rate risk. Foreign currencies and emerging markets involves certain risks such as currency volatility, political and social instability and reduced market liquidity.

To the extent that the investment advisor misjudges current market conditions, the Fund's volatility may be amplified by its use of derivatives, and its ability to anticipate price movements in relevant markets, underlying derivative instruments and futures contracts. The Fund intends to elect to be treated and to qualify each year, as a regulated investment company ("RIC") under the U.S. Internal Revenue Code. To maintain qualification for federal income tax purposes as a regulated investment company under the Code, the Fund must meet certain source-of-income, asset diversification and distribution of its income requirements. If the Fund were to fail to qualify as a RIC and became subject to federal income tax, shareholders of the Fund would be subject to diminished returns.

Investors should consider the investment objectives, risks, charges and expenses carefully before investing. For a prospectus with this and other information, please visit https://www.campbell.com/systematicmacro. Read the prospectus carefully before investing.
